Sequentially siting walk-in clinics in Philadelphia, continued...

Estimated number of young children and seniors within the SERVICE AREA of proposed clinic locations is reflected as a RANGE:

Under 5 years old (number of people)

3407 to

15654

Over 65 years old (number of people)

6053 to

29420

note: Bias may occur in sequencing of selection, which may give weight to certain factors depending on their position in the sequence. The virtue of the alternative is that there is less bias in results.
